

LISTENING TO YOUR SOUL WITH PSYCHIC TOOLS

Sandy Bonola, MBA, CAC, Above and Below Guidance LLC

Whether you call it intuitive or psychic guidance, it really is all about reading the energy of the moment to guide you in your inquiry, your life path or just a general question you always sought to answer. There are many tools available to accomplish this energetic connection that allows tapping into the Universal consciousness that drives the guidance you are seeking. I love the use of these tools as a way to enhance my psychic connection and derive clear answers. I especially love combining these tools in a reading and seeing how they all line up with the same direction!

In my readings I makes use of the following intuitive tools:

Tarot cards

Numerology

Gypsy Runes

Pendulum

Mediumship

Tarot cards are a very familiar tool and can be done in various spreads based on the inquiry and then are interpreted for the client to aid in guidance and direction. Numerology is considered sacred geometry where a person's personal characteristics such as birth date and name and converted to numeric vibrations that are then interpreted as to life path and karmic purpose. Runes are stones with symbols of meaning placed on them that a client asks a question of and the runes are "thrown". The position of the stones provide guidance based on the question being asked. I use gypsy runes which are based on certain symbols and in acknowledgment to my Italian gypsy heritage. A pendulum is another tool where a question is asked and based on the way the pendulum moves in response to energetic vibration provides a "yes" or "no" answer only. Finally, mediumship can be used to tap into a person's spirit guides and deceased loved ones that will provide guidance and direction on a person's inquiry by sending words of love and a loving perspective. They do know you best!!

Overall, these are powerful tools of guidance that provide direction on your life path. They also help you to make the best use of free will and free choice as to continue your path or make a course correction. The answers are available to you, seek and you shall find.
